Mathematical Cheat Sheet for Cutting

PUL calculations	Strip width	Number per strip	Strips per yard	Strips needed per case	Yardage per case	
Night PUL	10.75	7	3	5	1 plus	**3 Yards total PUL for one case**
	Cut night blocks 8.5 inches wide					
Day PUL	7.5 *	8 *	5 *	8 *	2 minus	
PUL 61.5" wide	*** Cut day blocks** 7.5" or 7.75" wide (if you choose the method shown). Day blocks must be **at minimum 7.5" square.**					

Flannel	Strip width	Number per strip	Strips per yard	Strips needed per case	Yardage per case	
40" wide						
Night covers	10.75	4	3	8	3 minus	**12.5 yards total flannel for one case**
Day covers	9	5	4	12	3	
Night padding	9	13	4	14 *	3.5 *	
Day padding	8	16	5	15 *	3 *	
* If your flannel is the weight that requires 6 strips for night, 4 strips for day
